PROFESSIONAL SUMMARY

Serial product builder and incubation strategist with 12+ years taking ambiguous technology concepts to validated, deployed products. Co-founded TouchE from zero — built the full product stack, designed and ran 4 enterprise pilot programs (HOT, Ozon, Eros Now, Paramount), and managed \$2.5M in product investment from concept through global deployment. Today advises AI startups on market validation, MVP definition, and pilot-to-scale execution — and independently ships software: 3 live products across mobile, FinTech, and AR. Executive **MBA** in Entrepreneurship & High-Tech Management (Technion) pairs investment-grade business-case rigor with a scientist's hypothesis-driven approach: every incubation opportunity starts as a testable market thesis, ends as an evidence-based go/no-go decision.

Core: Tech Incubation | 0-to-1 Execution | Market Validation | Pilot Program Design | MVP Definition | Business Case Development | Competitive & Technology Analysis | AI/ML Products | Unit Economics | Executive Storytelling | Cross-Functional Execution

PROFESSIONAL EXPERIENCE

Inon Baasov Ltd — Product Incubation & Startup Advisory

2024 – Present

Product Incubation Consultant & Independent Startup Builder

- Built **3 live software products solo** — **FamilyFlow** (family coordination mobile app), **TradePulse Journal Pro** (personal trading app), **BuildARPro** (AR-powered professional tool, in development) — end-to-end ownership from market hypothesis to deployed product, with no external team or budget.
- Led incubation engagements for 4 AI startups (**AiRakoon**, **Medicrowd**, **Smash+**, **Yazamos**): translated ambiguous problem statements into product requirements, personas, scoped MVPs, mapped competitive landscapes, and delivered pilot-readiness packages with defined success metrics.
- Delivered AiRakoon's 12-month product roadmap and first enterprise pilot brief — taking concept from whiteboard to first customer conversation and investment narrative.
- Built investment-grade business cases for 2 startups: market sizing, unit economics modeling, competitive differentiation, and go/no-go recommendation frameworks supporting funding rounds.

TouchE TV — AI Interactive Video Platform (SaaS / PaaS)

2018 – 2024

Co-Founder & Chief Product Officer

- Executed the full incubation cycle with real stakes: market hypothesis validation, technology differentiation decision, MVP build, 4 enterprise pilot programs, post-pilot synthesis, and scale-up roadmap — \$2.5M product investment, own capital on the line.
- Designed and ran **4 enterprise pilot programs**: scoped each pilot with explicit success metrics, collected qualitative and quantitative feedback, synthesized insights into product decisions (iterate, pivot, or stop), and built go/no-go briefs for each.
- Owned technology differentiation strategy for AI Recommendation Engine: evaluated competing approaches, identified ecosystem partners, and selected the platform architecture that enabled differentiated positioning versus alternatives.
- Translated complex AI/ML platform concepts into executive stakeholder narratives that secured enterprise partnerships and board-level buy-in; drove **38% team delivery efficiency** improvement through structured Agile execution.
- Managed cross-functional execution across R&D, QA, Sales, and 4 client engineering teams; delivered **99.99% uptime** SLA across all production deployments.

Arena Plus Financial Services — FinTech Platform (B2B)

2013 – 2018

Product Manager → Senior Product Manager (Promoted)

- Built commercial validation frameworks and financial models to assess product investment viability, size addressable markets, and prioritize roadmap — delivered **+22% user adoption** and **-20% time-to-market** across 3 geographies.
- Developed go-to-market hypotheses and competitive positioning analysis; synthesized market intelligence into executive-level product strategy recommendations and investment rationale.

Previous Experience

- Regulatory Affairs Consultant, Blau Pharmaceuticals (2009–2011) · QA Manager, Pharmabest & Philtel (2011–2013)

EDUCATION

- **Executive MBA**, Entrepreneurship & High-Tech Management — Technion, Israel Institute of Technology (2018)
- **B.Sc.**, Biotechnology & Food Engineering (Engineering) — Technion, Israel Institute of Technology (2008)
- Chemical Engineering Studies — McGill University, Montreal, Canada (2005)

MILITARY SERVICE

Israeli Air Force — Planning and Control Department

2000 – 2003

- Managed operational planning, resource coordination, and decision-making for a 27-person unit in a high-stakes, mission-critical environment —
